EDUCATION

DARTMOUTH COLLEGE, Master's of Engineering Management

September 2024 - November 2025

Collaborative Program between Tuck School of Business and Thayer School of Engineering

- **Relevant Coursework:** Marketing, Technology Assessment, Data Analytics, Operations Management.

UNIVERSITY OF MUMBAI, Bachelor of Artificial Intelligence and Data Science Engineering

January 2021 - June 2024

- **Relevant Coursework:** Project Management, Machine Learning, Big Data analytics, Deep Learning.
-

WORK EXPERIENCE

EXL SERVICES (Client: AIG) | Hybrid / New York, NY | **Project Manager Intern**

June 2025 - Ongoing

- **Consolidated** a PI-aligned delivery view (Excel/Power BI linked to Rally) across ~14 capabilities to **surface dependencies** early, keeping PI4 progress toward **35/83 SORs** on track.
- **Pulled UAT one sprint earlier** via readiness checklists, pre-booked power users, and gated sign-off windows—**shifting defect discovery left and cutting late rework**.
- **Centralized** developer-facing **onboarding & in-platform guidance** via a Confluence hub with live Power BI views, **reducing ad-hoc status requests** and **speeding release decisions** across ~14 capabilities.
- **Converted feedback loops** (biweekly PO forums, targeted user sessions) into **prioritized backlog items** with **clear user stories & acceptance criteria**, improving predictability and handoffs.
- **Automated** a recurring manual step in **Python**, **freeing ~5 hrs/week** for higher-value delivery.

SVIRTZ | MUMBAI, MAHARASHTRA | **Product Delivery and UX/UI Intern**

April 2023 - January 2024

- **Increased feature adoption +20%** via user-research-driven journey improvements; **designed A/B tests** and prioritized winning variants.
- **Raised engagement +22%** by **translating insights into backlog items** and **managing release scope** with engineering/design.

JUST DIAL | MUMBAI, MAHARASHTRA | **Business Analyst Intern**

December 2022 - January 2023

- Improved product efficiency **+15%** and reduced manual processing 30% by operationalizing NLP automation (AWS Comprehend).
-

PROJECTS AND LEADERSHIP

Endeavor AI — **Journaling Chatbot for Student Wellness (0→1)**

March 2025 - May 2025

- **Shipped** a privacy-first journaling AI chatbot MVP in **12 weeks**; defined scope, success measures, and guardrails (**not therapy**), stood up **onboarding + in-app guidance**, to drive adoption and a data-informed backlog.
- **Improved** session quality & continuity by adding **tone/intent detection**, **personalized prompts**, & **conversation memory**.

EmpowerEd, **Inclusive E-learning Platform**

January 2025 - March 2025

- Designed an accessible e-learning platform for visually impaired students, integrating screen reader support, Braille tools, and audio-based learning. Conducted market research with **35+** users, leveraging empathy maps and conjoint analysis to prioritize features and inform product strategy.

Student Product Strategic Consultant, State of Connecticut (Simulation)

September 2024 - November 2024

- Developed a strategic product roadmap by leveraging data-driven insights, aligning stakeholder goals and feature prioritization to maximize adoption and business impact.
- Conducted competitive analysis on energy storage solutions, identifying market gaps and informing product roadmap decisions for government stakeholders.

Detecting Malicious Blockchain Attacks

January 2023 - July 2023

- Enhanced security and privacy of Web3 decentralized applications by developing and implementing a Horizontal Federated Learning (FL) model using the Flower framework, resulting in a **30% decrease** in malicious attacks.
 - **Patent:** Co-inventor of "Detection of Malicious Blockchain Attacks using Federated Learning," Application No. 202321056911, filed August 2023, published October 2023.
-

SKILLS & TOOLS:

- Agile & Scrum, Optimization Modeling, A/B Testing, TensorFlow, Keras, PyTorch, Python, SQL, Data Visualization (Tableau, PowerBI), AI Product Strategy & Personalization, Go-to-Market (GTM) Strategy with AI.
